

Because I am running locally as an AI assistant on your computer, Jane cannot access this chat conversation directly from her own computer.

However, **she does not need access to this conversation to edit and run the salon!
**

To hand over full control to Jane, she only needs access to the two main dashboards we set up:

1. For Website Editing (Sanity Studio)

Jane can edit all website content (prices, treatments, testimonials, products, and voucher records) from any computer or iPad:

* **The Login Link**: **https://rc840ke9.sanity.studio**

* She can log in using her email/password or Google account that is linked to Sanity.

* Once logged in, she will see a clean, visual panel where she can type changes and click **"Publish"*** to update the website instantly.

2. For Payment & Order History (PayPal Developer)

Jane can track orders, check payment logs, and review client transactions:

* **The Login Link**: **https://developer.paypal.com** (or her regular PayPal Business dashboard).

* She can view all capturing transactions here.

How to share this chat history with her (if desired):

If you want to show Jane what we have built in this conversation, you can print or send her the **Walkthrough** and **Marketing Plan** files directly from your desktop:

* **[walkthrough.md](file:///Users/rogerrobinson/.gemini/antigravity/brain/193941b0-b286-4efd-b1c2-7a69f2e01717/walkthrough.md)** (Summarizes all the code and database systems we built).

* **[marketing_seo_plan.html](file:///Users/rogerrobinson/Library/Mobile%20Documents/com~apple~CloudDocs/Desktop/Sunshine%20Beauty%20Therapy/marketing_seo_plan.html)** (The SEO plan we just created).
